- * Maintenance free.
- * Visibly small footprint.
- * Prevents gate slam noise.
- * Self Closing Gates up to 260 lbs.
- * Hydraulics are concealed within the post, providing a controlled, quiet close, in a tamper-resistant, compact design.

CAUTION:

1) You Must Install A Gate Stop With This Product !

All SureClose SF models require an added gate stop to prevent the gate from being forced past 90 degrees, causing permanent damage to the self-closing mechanism. SureClose products do not contain an external gate stop.

It is up to the purchaser to provide the proper stop for your specific application. **Failure to use a gate stop will void your warranty.** D & D Tech doesn't make a gate stop for the SureClose Hinges (Center & Flush Mount) yet.

2) Based on maximum gate size 72" H x 40" W. For gates with greater H x W, or if conditions such as wind play a role, use hinge combinations with higher self-closing weight ratings.
