TB175 - Residential Flush Mount Gate Closer

Closes Gates Up to 54" Wide & 125 lbs. 90° Max Opening.
Adjustable Latching & Closing Speeds

The gas powered pump is adjustable for both the closing and latching speeds. Mounts on opening side of gate, pushing it closed and fitted with an optional hold open feature. Installs on the side, top, middle or bottom of either right or left hand of the gate. The distance between the gate and post should be as close as possible, 1/4" to 3/8" gap recommended. It is critical to mount the TB175 as close as possible to the gate's pivot point. The steel casing has a powder coated gloss black finish. Wt. 2.25 lbs. **One Year Warranty**

The TB175 may not be compatible with offset hinge arrangements or arrangements that create more than 2" between gate post and gate, as it is critical to mount the closer as close as possible to the gate's pivot point.

Length: 12 1/2"
Width: 2 1/2"
Depth: 2 3/8"
